

INFERNO

Turf Type Tall Fescue

SPECIAL FEATURES

INFERNO The Hottest Variety Around!

INFERNO blazes into the turf-type tall fescue market with superior quality, fine leaf texture and attractive dark green color as shown in the

independent National Turf Evaluation Program (NTEP) trials comparing 159 commercial and experimental tall fescue varieties.

INFERNO was developed through a cooperative effort between the New Jersey Ag Experiment Station and Jacklin Seed *by Simplot*. Plots were selected based on dark color, good resistance to disease, semi-dwarf stature, high turf density, and medium maturity. Approximately 80% of the breeder plants were classified as being infected with endophyte for increased persistence and insect resistance.

- For use in sun or partial shade
- Excellent for home lawns, parks or athletic fields
- Quick germination leads to better establishment

AGRONOMIC CHARACTERISTICS

- Tied #1 in Overall Turf Quality in 2nd year*
- One of the finest leaf textures in NTEP
- #1 variety for summer density*
- #2 quality in the Northeast*
- Excellent durability under traffic
- Superb Brown Patch resistance
- Awesome *Typhula* Blight resistance*
- Excellent fall color

SUGGESTED SEEDING RATE

350 - 525 lbs./acre or 8-12 lbs. per 1,000 sq.ft.
