

Hardy & Water-Saving Perennial Ryegrass

Rainwater is a remarkable Perennial Ryegrass, tough enough to handle high traffic and resist dollar spot, while also proving to be drought-tolerant, achieving the rigorous standards of TWCA - the Turfgrass Water Conservation Alliance.

Well-suited for both new sod and overseeding, **Rainwater** has a demonstrated ability to serve a wide range of customers' needs - from the sports turf manager and golf superintendent to the professional landscaper and homeowner.

Call us today to learn how **Rainwater** is breaking new ground!

Rainwater is a TWCA qualified and Blue Tag certified grass seed ideal for sports field, golf and landscaping applications, including new seeding and overseeding.

In a 2011 NTEP trial, **Rainwater** was in the top 10% of Perennial Ryegrasses studied for traffic wear resistance (at Blacksburg). And again in a 2012 NTEP trial, **Rainwater** was rated in the top 10% for turfgrass quality.

What makes these superior rankings unique is **Rainwater's** qualification by the Turfgrass Water Conservation Alliance (TWCA). The protocols for TWCA qualification are highly demanding, requiring that water-starved grass maintain green covering through a series of drought simulations. Acceptance of this two-year protocol is only available after the organization has received two year's of independent third-party data verifying the turfgrass qualifies for testing.

As TMI developed the **Rainwater** seed, we also sought to provide resistance to a common turfgrass problem: Dollar Spot. A 2011 NTEP trial demonstrated Rainwater's substantial resistance to the disease, providing additional peace-of-mind to your customers.

KEY BENEFITS:

- **Drought-Resistance / Water Savings**
- **Traffic Wear Resistance**
- **Dollar Spot Resistance**

Industry Leaders

TMI develops, produces and markets turf grass seeds for the United States, North America and more than 20 other countries around the world.

Golf courses, sod growers for sod production and landscapers the world over have found TMI's cool season grasses, warm season grasses, golf grass, and specialty grasses to be state of the art when it comes to color, texture, uniformity, disease resistance and overall performance.

Our extensive network of carefully chosen seed growers produces seeds of the highest quality in the world, with high germination rates and purities that exceed official standards. Our certification, testing and quality controls continue to raise the benchmark for the entire Industry.
